Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 February 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

The amendment filed on February 10, 2005 have been received and entered into the application.

Applicant's arguments with respect to claims 30-32 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 30-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 30 recites the limitation "multivitamin" in line 8. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1617

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 30-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steiner (Thrombosis and Haemostasis, 1983).

Steiner teaches the effect of vitamin E administration on platelet function in a group comprising administration of combination of vitamin E and aspirin. (Summary). Steiner teaches aspirin was administered 300mg every other day along with increasing vitamin E dosage (400 I.U.-1,200 I.U). It is noted that these dosages are within Applicant's effective dosages set forth in claims 30-32). Steiner teaches that platelet adhesion to collagen was strongly inhibited by a combination of vitamin E and aspirin and this result suggest that the vitamin E administration have a beneficial effect in patients suffering from arterial thromboembolic disease. (summary, page 73, right-hand column first paragraph).

Steiner does not teach the medicament comprising aspirin and vitamin E.

It would have been obvious to one of ordinary skill in the art to formulate the medicament comprising vitamin E and aspirin. One would have been motivated to formulate the medicament comprising aspirin and vitamin E in order to achieve

Art Unit: 1617

beneficial effect in patients suffering from arterial thromboembolic disease because the combination of aspirin and vitamin E therapy strongly inhibited the platelet adhesion to collagen as taught by Steiner. One would have been further motivated to combine aspirin and vitamin E in a single medicament in order to conveniently treat patients suffering from arterial thromboembolic diseases by a single medicament.

For these reasons the claimed subject matter is deemed to fail to patentably distinguish over the state of the art as represented by the cited references. The claims are therefore properly rejected under 35 U.S.C. 103.

None of the claims are allowed.
